PROFILE

Innovative and results-driven Senior Mobile Application Developer with 7+ years of experience crafting cutting-edge Android and iOS applications. Proficient in Kotlin, Java, and modern Android frameworks, with expertise in building scalable, high-performance apps. Adept at leading cross-functional teams, collaborating with product managers and designers to deliver user-centric solutions that drive engagement and satisfaction

EMPLOYMENT HISTORY

Nov 2021 — Present

Senior Mobile Application Developer, ASICS Digital

Canada

- Led the development of new features for the Runkeeper Android and Wear OS app, contributing to a 30% increase in user engagement over the course of 12 months.
- Architected and maintained a scalable, modular codebase using Kotlin, Jetpack Compose, and MVVM/MVI, reducing code complexity by 40% and improving app maintainability.
- Collaborated closely with Product Managers and the Design team to align development with product OKRs, ensuring that technical execution met strategic product goals. This collaboration resulted in a seamless user experience and the delivery of key features, contributing to a 15% increase in customer satisfaction.
- Fostered a culture of technical excellence through architectural oversight in code reviews and structured mentorship, resulting in a quantifiable improvement in code quality and team velocity.
- Ensured robust CI/CD pipelines and automated testing to reduce production bugs and facilitate rapid deployment.

Nov 2021 — Present

University Lecturer, McGill University

Canada

- Taught core programming concepts, data structures, algorithms, and best practices in modular and maintainable code.
- Delivered hands-on mobile app development courses covering React Native and Android fundamentals.
- Information System Security: Educated students on secure system design, threat modeling, risk assessment (application, network, physical), and cryptography techniques
- Developed course materials, assignments, and practical exercises to enhance learning outcomes.
- Mentored students on project work, debugging techniques, and real-world application of programming/security concepts.

Sep 2020 — Nov 2021

Intermediate Mobile Application Developer, OneSpan

Canada

- Contributed to the design, development, and maintenance of cutting-edge security-focused mobile applications and software components, enhancing the company's security offerings.
- Spearheaded the migration of legacy code from Java to Kotlin, improving code readability, performance, and maintainability by 60%.
- Conceptualized, developed, and tested native mobile applications, including UI components, core functionality, and SDKs, contributing to the successful launch of multiple high-impact features.
- Executed extensive code testing, including robustness, edge case analysis, and usability testing, leading to a 40% reduction in critical bugs.
- Build, debug, and ship Android solutions that promote a security layer through building SDKs to banking applications and systems.

Sep 2020 — Nov 2021

Mobile Application Developer, Plasmatic Technologies

Canada

- Built and maintained large-scale React Native applications for enterprise clients, including insurance companies, delivering consistent cross-platform experiences on iOS and Android.

- Modernized legacy React Native codebases by migrating from JavaScript to TypeScript and introducing clean, scalable architecture, improving maintainability and developer confidence.
- Developed reusable UI components and shared business logic to accelerate feature delivery and ensure consistency across multiple applications.
- Executed extensive code testing, including robustness, edge case analysis, and usability testing, leading to a 40% reduction in critical bugs.
- Optimized application performance by reducing unnecessary re-renders and improving state and navigation flows, resulting in smoother and more responsive user experiences.
- Strengthened engineering standards through mentoring, code reviews, and ownership of build and release workflows, improving code quality and deployment reliability.

Mar 2020 — Aug 2020

Mobile Application Developer, Lightwave Technology

Canada

- Worked in agile scrum, worked collaboratively with other developers, data analysts, product owners to challenge the status quo and improve the lives of our customers, one release after the other.
- Implemented MVP and MVVM architecture to handle complex code and providing code modularity.
- Improve the algorithm for the video streaming over the stream of data received.
- Manage multiple priorities and deadlines in a dynamic, fast-paced environment.
- Updated the CI/CD scripts as necessary for integration process.

Aug 2017 — Dec 2018

Junior Application Developer, Codedrill InfoTech

India

- Developed application for news readers and allow users to publish news articles with 2k-3k active users with 4.7/5.
- Worked closely with product owner to customize the application.
- Collaborated with QA on identifying bugs and implementing fixes and minor application enhancements.
- Participated in design and wireframe review to provide a technical perspective on implementation.

Jan 2017 — Jul 2017

Intern Application Developer, Vlogic Labs Private limited

India

- Developed and maintained a food delivery application with 10K daily active users.
- Took responsibility for estimating, planning, implementing, and deploying large features and releases, with the help of your teammates.
- Consumed Payment gateway API for secured and successful transactions.
- Increased customer satisfaction rate by 20% and application ratings from 3.7 to 4.2/5 by resolving issues based on customer feedback.
- Participated in agile software development with daily scrum meetings and bi-weekly sprints.

EDUCATIONAL BACKGROUND

Sep 2018 — Aug 2020

Master of Engineering, (Software Engineering), Concordia University

Aug 2013 — May 2017

Bachelor of Technology (Computer Science), Punjab Technical University

SKILLS

Mobile and Web based Applications

Windows Application

Java

Kotlin

Python

Android

JavaScript

React Native

React JS

Redux

JavaFX

Development

Dagger Hilt

RxJava

Coroutines

MVC

MVVM

MVI

OOPS

Jetpack Compose

Typescript

Code Analysis

Unit Testing

Google's Android design principles

RESTFUL APIs

Android SDK
